

# **Gutter** **Shutter**<sup>™</sup>

## WARRANTY AGREEMENT

The Gutter Shutter System has factory baked enamel paint finish that is covered by the Gutter Shutter Company's 20-Year Finish Warranty against chipping or flaking. Some end caps, mitered corners and other accessories may require spray painting to match the color of the Gutter Shutter gutter. These parts are not included in the paint warranty.

The Gutter Shutter system has a Lifetime, No-Clog Warranty and, in the event the gutters become clogged, the Company agrees to clean the gutters at no charge to the Customer. The No-Clog Warranty is only issued with the utilization of oversized 3"x4" downspouts and wide mouth outlets. If downspouts smaller than 3"x4" are used, no warranty is given. The No-Clog Warranty will become valid once the contract is paid in full. Except as otherwise provided, only materials purchased and installed by the Company are warranted. The No-Clog Warranty on the Gutter Shutter gutter is not transferable. The Unique and patented Gutter Shutter design makes it a very effective debris shedding system. Therefore the system internally cleans itself. However, no gutter system will keep 100% of debris out. It is possible for a small amount of debris to enter, which will wash out through the downspouts. It is important to understand that a small amount of debris is not a clog. The definition of a clog is when the water will not go down the wide mouth drain outlet.

The Gutter Shutter gutter system has a completely different appearance when compared to conventional gutters. The irregularities can be caused by your property having the following conditions, but are not limited to: irregular shingles edges, roof-decking problems, unlevelled roof rafters, exposed flashing, etc. In addition, because the gutter is sloped to allow water to flow towards the downspout, the end of the Gutter Shutter gutter (toward the downspout) may be inches lower than the highest point of the gutter. This will be more visible than with conventional gutters. Any or all downspouts added to, or elbows turned a different direction than original direction, either by customer or by representative's suggestion, release the Company of any and all liability from damages to home or property.

These warranties are valid only on a complete Gutter Shutter Leaf and Debris System. Algae and/or other natural or chemical buildup may occur on either the Hood or Trough of the Gutter Shutter System. Periodic cleaning of the exterior system is suggested (pressure washing recommended).

\*The Gutter Shutter Company and/or any of its licensed subsidiaries are not responsible to clean the exterior of the Gutter Shutter System.
