

The Kuhn Construction Design/Build Difference

Kuhn Construction's mission is to provide our neighbors on Long Island, the highest level of quality and service, always striving to exceed our client's expectations in their home remodeling experience. Below is the Kuhn Design/Build Difference.

1. Excellence in Design

A successful remodel doesn't just happen. True harmony must exist between designing and building. We realize the design must match your desires precisely, so with patience and an expert eye, we will walk through the design process with you.

2. Guaranteed Budget & Detailed Specs

You may be surprised by the number of questions we ask and the time we spend with you during our initial meetings. We have learned that time invested early in the remodeling process is the key to the project going smoothly and achieving the final look and results you desire. We work with you to select all of the materials on the job so that we can guarantee to keep you on budget and so that our final estimate is a firm price.

3. Prompt & Clear Communication

We're eager to hear from you. You can expect a warm and friendly tone from the moment we begin communicating. Also, you can expect all voicemails, emails, messages (through our powerful and easy-to-use online client portal, Co-Construct) and texts to receive a response within hours, not days. We're committed to this level of communication before, during, and after the sale.

4. Jobsite Cleanliness

We promise to maintain a clean, organized, and safe work area to minimize disruption to your family's routine. We have a complete dust containment system (Build Clean) to minimize and contain dust extensively.

5. Guaranteed Schedule

Happy homeowners have their projects started and completed on time. When our team gets on your job – we stay committed to it all the way through to completion. Each job has a dedicated production manager and on site project manager. Our client-based software allows our clients to see a produced schedule and daily job log to keep everyone informed on what is going on.
